EDUCATION

University of Washington — Seattle, WA
Master of Science in Computational Linguistics — *Sep. 2025 – Expected Jun. 2027*

Hankuk University of Foreign Studies, HUFS — Seoul, South Korea
Bachelor of Arts in Linguistics & Cognitive Science — *Mar. 2018 – Feb. 2024*
Bachelor of Language Science in Artificial Intelligence (Double Major)
Advisor: Jeesun Nam

RESEARCH EXPERIENCE

LT4CPR, UW — Seattle, WA
Research Assistant, Supervisor: Prof. Fei Xia — *Jun. 2026 – Oct. 2026*

- Developed evaluation methods for comparing LLM-generated crisis situation reports with reference reports, focusing on semantic content preservation and hierarchical discourse alignment
- Designed document-, section-, subsection-, and bullet-level evaluation pipelines combining lexical and semantic similarity metrics with bipartite matching for fine-grained content alignment

DICORA Computational Linguistics Lab, HUFS — Seongnam, South Korea
Undergraduate Research Intern, Supervisor: Prof. Jeesun Nam — *Jan. 2022 – Sep. 2022*

- Formalized context-dependent evaluative meaning in Korean financial news using finite-state Local Grammar Graphs (LGGs)
- Analyzed interactions between attribute nouns and directional predicates to identify context-sensitive sentiment polarity

PUBLICATIONS

[1] *Overview of the LT4CPR 2026 Shared Task: Generating Situation Reports from Social Media Messages.* Fei Xia, Haotian Zhu, **Yun Woo Lee**, Eitan Grenev, Allison K. Burton, Yingzhe Fan, William D. Lewis, Antonis Anastasopoulos, and Belu Ticona.
AACL-IJCNLP Workshop on Language Technologies for Crisis Preparedness and Response (LT4CPR), 2026.

[2] *Relational Grounding Failures in Zero-Shot Cross-Lingual Dialogue Summarization with Small Language Models.* **Yunwoo Lee**[*], Ziwa Li[*], and Jennifer Huang[*].
EMNLP Workshop on Grounding Language Models: Learning Faithfully and Efficiently (GroundLM), 2026.
[*]Equal contribution.

INDUSTRY EXPERIENCE

Korea Electronics Technology Institute (KETI) — Seongnam, South Korea
Researcher, Language Team - AIRC (Artificial Intelligence Research Center) — *Sep. 2024 – Jun. 2025*

- Developed trustworthiness benchmarks for Korean LLMs (hallucination, reliability, sociocultural bias) through prompt design, rubrics, and failure-mode analysis

· Validated a Korean multimodal dialogue dataset by aligning utterance-level pragmatic functions with nonverbal cue labels to improve human–AI interaction robustness

NCSOFT Seongnam, South Korea
Language AI Researcher, Language Data Team *Mar. 2024 – Sep. 2024*

· Led AI Red Team initiatives, creating robust testing protocols and diverse conversational datasets to identify and mitigate ethical and safety risks in language models
· Categorized language model vulnerabilities into single-turn versus multi-turn threats by identifying discourse-level risks, including anaphoric references that are undetectable within a single turn

SK TELECOM Seoul, South Korea
Linguistic Data Analyst, AI Technology Unit *Feb. 2023 – Jun. 2023*

· Led human-centric annotation to ensure sociolinguistic coverage (honorific levels, informal slang, code-mixing) in conversational training data
· Created a linguistically grounded ambiguity taxonomy and applied it to normalize Korean queries and improve chatbot robustness

AWARDS AND HONORS

Graduate Student Conference Presentation Award, UW 2026
CLMS Scholarship, UW ($14,500) 2025
Departmental Scholarship, HUFS 2021, 2023
Outstanding Undergraduate Thesis Award, HUFS 2022
Best Composition Award, HUFS 2018
Student Leadership Scholarship, HUFS 2018
Korea National Merit Scholarship 2018

RESEARCH PROJECTS

Learning Linguistic Generalizations Across Languages from Indirect Evidence: A Filtered-Corpus Study of English and Korean
M.S. Thesis, University of Washington *Oct. 2026 – Present*

· Investigating bidirectional cross-linguistic generalization of dative constructions in English and Korean using Filtered Corpus Training
· Designing controlled experiments comparing sequential and joint training, with minimal-pairevaluations of grammatical generalization

Linguistic Pattern Analysis for Financial Sentiment: Attribute-Verb Relationships in Stock Market Articles
B.A. Thesis, HUFS *Sep. 2022 – Dec. 2022*

· Modeled semantic constraints between attribute nouns (e.g., interest rates, costs) and directional predicates (rise/fall) to capture context-dependent polarity shifts in financial discourse
· Recognized with the Outstanding Undergraduate Thesis Award

ACADEMIC SERVICE

[1] **Workshop Reviewer** *VLM4RWD Workshop (NeurIPS 2026)*

LANGUAGES AND TECHNICAL SKILLS

Programming	Python, R, C++, SQL, Java
ML/NLP	PyTorch, NLTK
Tools	Git, Linux/CLI
Typesetting	LaTeX
Languages	Korean (native), English (fluent)
