## EDUCATION

---

### University of Washington

Master of Science in Computational Linguistics

Seattle, WA

Sep. 2025 – Present

### Hankuk University of Foreign Studies, HUFS

Bachelor of Arts in Linguistics & Cognitive Science

Seoul, South Korea

Mar. 2018 – Feb. 2024

Bachelor of Language Science in Artificial Intelligence (Double Major)

Advisor: Jeusun Nam

## RESEARCH EXPERIENCE

---

### LT4CPR, UW

Research Assistant, Supervisor: Prof. Fei Xia

Seattle, WA

Jun. 2026 – Present

- Evaluating LLM-generated situation reports (SITREPs) for crisis response through faithfulness, information coverage, and structured content alignment analysis
- Developing section-level and bullet-level evaluation pipelines using ROUGE, BERTScore, and bipartite matching to compare system outputs against reference reports

### DICORA Computational Linguistics Lab, HUFS

Undergraduate Research Intern, Supervisor: Prof. Jeusun Nam

Seongnam, South Korea

Jan. 2022 – Sep. 2022

- Contributed to two research projects (1) constructing datasets for sentiment analysis of stock-market articles, and (2) generating NLU datasets for training a big-data-driven chatbot model

## PUBLICATIONS

---

[1] *Relational Grounding Failures in Zero-Shot Cross-Lingual Dialogue Summarization with Small Language Models*. **Yunwoo Lee**, Ziwa Li, and Jennifer Huang. *EMNLP Workshop on Grounding Language Models: Learning Faithfully and Efficiently (GroundLM)*, 2026.

## INDUSTRY EXPERIENCE

---

### Korea Electronics Technology Institute (KETI)

Researcher, Language Team - AIRC (Artificial Intelligence Research Center)

Seongnam, South Korea

Sep. 2024 – Jun. 2025

- Developed trustworthiness benchmarks for Korean LLMs (hallucination, reliability, sociocultural bias) through prompt design, rubrics, and failure-mode analysis
- Validated a Korean multimodal dialogue dataset by aligning utterance-level pragmatic functions with nonverbal cue labels to improve human–AI interaction robustness

### NCSoft

Language AI Researcher, Language Data Team

Seongnam, South Korea

Mar. 2024 – Sep. 2024

- Led AI Red Team initiatives, creating robust testing protocols and diverse conversational datasets to identify and mitigate ethical and safety risks in language models
- Categorized language model vulnerabilities into single-turn versus multi-turn threats by identifying discourse-level risks, including anaphoric references that are undetectable within a single turn

**SK TELECOM***Linguistic Data Analyst, AI Technology Unit*

Seoul, South Korea

*Feb. 2023 – Jun. 2023*

- Led human-centric annotation to ensure sociolinguistic coverage (honorific levels, informal slang, code-mixing) in conversational training data
- Created a linguistically grounded ambiguity taxonomy and applied it to normalize Korean queries and improve chatbot robustness

**RESEARCH PROJECTS**

---

**Probing Lexical Ambiguity Resolution in LMs through Fine-Grained Semantic Relation Prediction***M.S. Thesis, University of Washington**Mar. 2026 – Present*

- Investigating lexical ambiguity resolution in language models through fine-grained semantic relation prediction across noun and verb senses
- Evaluating model behavior under contextual and oracle meaning conditions using relation-sensitive semantic diagnostics

**Linguistic Pattern Analysis for Financial Sentiment: Attribute-Verb Relationships in Stock Market Articles***B.A. Thesis, HUFS**Sep. 2022 – Dec. 2022*

- Modeled semantic constraints between attribute nouns (e.g., interest rates, costs) and directional predicates (rise/fall) to capture context-dependent polarity shifts in financial discourse
- Recognized with the Outstanding Undergraduate Thesis Award
